

MOHAMMED JAMAL

UI/UX Designer | Enterprise Intranet and Product Design

+91 6382626613jamaluiux04@gmail.comlinkedin.com/in/mohammed-jamal-217b0b106Chennai, India

PROFESSIONAL SUMMARY

UI/UX Designer with 3.7+ years of experience delivering 50+ enterprise intranet portals for global clients across industries including food science, analytics, and logistics. Specialise in end-to-end design - conducting stakeholder interviews, defining information architecture, building high-fidelity Figma prototypes, and collaborating on SharePoint and SPFx implementation. Equally comfortable working independently as a solo designer and collaborating with cross-functional teams of developers, PMs, and stakeholders. Beyond client work, I apply design thinking to real-world product problems - validated through user research, usability testing, and documented iteration cycles. Currently seeking a mid-level UI/UX Designer role at a product company, MNC, or growth-stage startup.

WORK EXPERIENCE

UI/UX Designer | SharePoint DesignsNovember 2022 - Present | Chennai, India

- Successfully delivered 50+ projects for corporate clients by designing intuitive, responsive user interfaces for enterprise intranet platforms and internal tools.
- Developed user-friendly landing pages and department sites by streamlining content architecture and creating intuitive navigation systems that enhanced the employee experience.
- Produced high-quality UX design solutions including wireframes, visual designs, and prototypes, as well as graphic assets like posters and social media visuals.
- Conducted user research and usability testing to inform design decisions and continuously improve the user experience across client projects.
- Gathered and evaluated user requirements in close collaboration with stakeholders, product managers, and engineers to ensure designs met both business goals and user needs.
- Built reusable component libraries and design systems in Figma, reducing design-to-development handoff time and ensuring visual consistency across multiple projects.
- Developed custom SPFx web parts including interactive US Map components and employee onboarding dashboards with personalized welcome flows and 90-day milestone timelines.
- Created multi-page Figma prototypes with Smart Animate transitions and variable matrix layouts for stakeholder presentations and client approval workflows.
- Designed product landing pages and marketing assets for internal tools including Doc Vault, aligned to client brand guidelines and design systems.
