PROFESSIONAL SUMMARY

UI/UX Designer with 4 years at SharePoint Designs in Chennai. I've shipped 50+ enterprise projects for global clients across maritime, healthcare, manufacturing, and food science, a mix of intranet portals, mobile apps, and websites. My work covers the full process, from stakeholder interviews and IA to Figma prototypes and developer handoff. Recently designed a live commercial SaaS product on my own, both the landing page and the application UI. Looking for a mid-level product or UX role where I can bring that enterprise rigour to a broader user base.

SKILLS

Design: Figma, Adobe XD, Adobe Illustrator, Photoshop, Framer, Webflow

UX: User Research, Information Architecture, Wireframing, Prototyping, Usability Testing, Competitive Analysis, Personas, User Flows

UI: Visual Design, Interaction Design, Responsive Design, Design Systems, Component Libraries, Accessibility

AI Tools: Claude, ChatGPT, Figma Make, Prompt Engineering

Collaboration: Stakeholder Management, Design Critique, Agile, Notion, Miro, FigJam, Jira

WORK EXPERIENCE

UI/UX Designer

SharePoint Designs, Chennai

November 2022 – Present

- Shipped 50+ enterprise projects for global clients, mostly intranet portals but also mobile apps and marketing sites.
- Ran stakeholder interviews, built information architecture, and designed high-fidelity Figma prototypes for products used by thousands of employees daily.
- Conducted user research, competitive analysis, and usability testing to replace assumptions with evidence before committing to a design direction.
- Built reusable Figma component libraries and design systems that cut repeat work and kept visual language consistent across client projects.
- Designed a commercial SaaS product on my own, from the marketing landing page in Webflow to the full application UI in Figma.
- Use Claude and ChatGPT daily for research synthesis, UX copy, draft personas, and sharpening design decisions before stakeholder reviews.
- Worked closely with developers, product managers, and stakeholders through the full build, not just the handoff file.

KEY PROJECTS

Enterprise Document Management SaaS Product

Live commercial SaaS product I designed solo over 2 months — the marketing site, the application UI, and the design system behind both. Four user types with different mental models (business users, compliance managers, IT, employees), unified in one coherent product.

Health-Focused Food Delivery Mobile App

A mobile app built around ingredient transparency and allergen safety. Ran a 30-respondent survey and 6 in-person usability tests, then shipped 4 design iterations based on what people actually struggled with.

Fuel Price Comparison and Roadside Assistance App

A mobile app for a decision drivers make weekly but think about for ten seconds. Six screens, two personas, a dark-mode design system, and complete user flows for both daily commuters and outstation travellers.

EDUCATION

Bachelor's Degree in Fire and Industrial Safety

ASSET Institute of Technology, Chennai
2017 – 2021
